**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I live in San Francisco but I choose Sonic as my residential internet provider. The alternative - AT&T and Comcast - are much more expensive and slower. I've tried them before and they are slow - in particular very limited uplink. I work from home a lot as a caregiver and need decent uplink speed together with good download speed. Both AT&T and Comcast experienced drop- out in the middle of online conference meetings.

Sonic internet is much cheaper and most importantly I have every few drop call issues with Sonic. I understand that smaller internet providers like Sonic need access to inter-city copper connections in order to survive. Please do not change the current law that allow competition from smaller internet providers. Thank you.
